Lance,

My apologies on the delay in responding to your e-mail. I have been traveling out of state. I saw your e-mail while away but needed to return to the office to look at the publication by Gibb and Cartwright, 1982, that you cited. Both Gibb and Cartwright are long retired, hence your difficulty in locating them.

As you noted, I did work on their project for a short while and from that experience can verify that "site A" in ISWS-ISGS Coop Groundwater Report 9 by Gibbs and Cartwright, 1982, is the Sandoval Zinc Company Site which they studied.

**Subject:** information on Sandoval Zinc Company

Hello Sir

I am currently working on a documentation record on the Sandoval Zinc Company Site located in Sandoval Illinois. This documentation record will allow the Sandoval Zinc Company site to be added to the National Priorities Listing. Upon working on this site, I have come across a publication, *Retention of Zinc, Cadmium, Copper, and Lead by Geologic Materials* by Gibb and Cartwright. I would like to use this publication in the references, but due to the fact that the Sandoval Zinc Company site is unnamed in the report poses a problem. I have tried to find and contact James P. Gibb and Keros Cartwright, but have not made any contact. Upon further investigation in the report I did find that you were mentioned in the acknowledgements as collecting samples during the drilling at this site.

I was interested in verifying that Sandoval Zinc Company was Site A as mentioned in the publication. If you were to verify that Site A is Sandoval Zinc, I will be able to site the report in the documentation record. A short letter verifying the identity of the site would be great. If you have questions or concerns please contact me.

Thank you
